

# ON THE WIND

1985 MONTH: Pindar scholarship finalists • America's Cup news • VDH's wrong-way record

## First Shot

These incredible photographs were taken by French photographer Thierry Martinez from a helicopter in late February. *Mars-Ciel IV*, heaving in the 25 knots of wind, was off the northern coast of Brittany en route for Antigua and the Caribbean regatta season. Just remember, this boat is 140ft long.
